

New Patient?

Setting up a consult appointment

New patients or patients possibly interested in our practice are invited to schedule a new patient consult appointment where you can meet the doctor you are interested having as your primary care provider and ask any questions you may have about the Pediatric Partners of Virginia. This is not a requirement, but can be an opportunity to learn more if you aren't sure we are the right practice for you and your child.

New patients may join our practice by scheduling the next regularly scheduled check up (as per our Check Up Schedule), or call for an appointment when needed for an illness or concern.

Setting up a consult appointment

Before your first appointment, please print out a patient registration form (available at ppvkids.com) and bring the completed form to the first visit. The front staff will need ALL sections of the form completed before they can check you in. In order to expedite your check-in process, you may also want

to read our Notice of Privacy Practices and complete the Written Acknowledgement Form.

It is very helpful to have a copy of your medical records from the previous pediatrician on hand when you come to your first appointment including a copy of your child's immunization records. If you don't have this information, please contact your former pediatrician's office and request your records.

We participate with most major insurance companies, but always check with your insurance carrier to verify our physicians are on your insurance plan.
